StartupTN: Empowering Student Innovators

StartupTN, an initiative by the Tamil Nadu Government, aims to empower students to develop innovative ideas. This year, over 600 teams from across Tamil Nadu participated in the competition, with 135 teams advancing to the first round.

We are proud to announce that our ChettinadTech students—Kaniska M. P., Santhiya K., and Sarumathi A. of IV CSE, excelled in the competition as finalists.

Their project, "Smart Ration," secured them a spot among the top 25 teams in the finals of the StartupTN initiative.

We congratulate our young innovators on this outstanding accomplishment!
