### Single Use Plastic Ban

The "Avoid Single-Use Plastic" programme was initiated by our Social Welfare Club and Green Club, with the objective of reducing plastic waste and promoting sustainable practices within our student community.

In this connection, various strategies were implemented to educate, engage, and encourage behavioural changes among students and staff members on our campus. On December 13, 2023, students were actively involved in cleaning plastic materials on our campus, and on December 14, 2023, a surprise raid was conducted in the college canteen to find out about the single usage of plastic, and instructions were given to them to avoid using plastic.

This proactive measure aimed to create awareness and enforce a commitment to reducing plastic consumption within our college community.
